

SOME THINGS JUST KEEP GETTING BETTER!

Certain places, certain destinations, certain authors, we all know that some just keep getting better! Libramation's Self-Check units are no exception.

You may have considered a few different types, and liked one or two of them. However, those who know about self-check units know that Libramation's Mark-3 series, towers above the rest!

Allowing your patrons to experience a patron friendly and confidential method of managing their own borrowing transactions of library materials, will significantly reduce the workload for your library personnel. Some of our self-check units in the field have proven to handle over 25,000 items per month.

It gets even better, introducing the **MARK-3/TT**, a new addition to the already familiar MARK-3 series. This self-contained counter-top unit can be ordered as a barcode or RFID model, or even better, it can be upgraded from barcode to RFID at a later date.

There is no need to put off purchasing or leasing this cost effective unit, which starts at US\$ 9,995. If you use EM security, we can upgrade the unit by adding the desensitizing feature.

We know that your Library needs the most reliable, durable, high quality and most "Patron Friendly" self-check system, now you have even better choices!

For further information, you can visit our website at www.libramation.com and follow the Mark-3 link, e-mail us at info@libramation.com or phone us toll free at 1-888-809-0099.
