

Self Check Solutions

Almost every aspect of the lending process is automated with **Libramation's**

Easy-Check™

The SCOT-Easy-Check allows patrons to manage their own transactions while borrowing library materials. Library users can access their accounts, review materials presently borrowed, and renew the lending period of materials. These units significantly reduces handwork for library personnel.

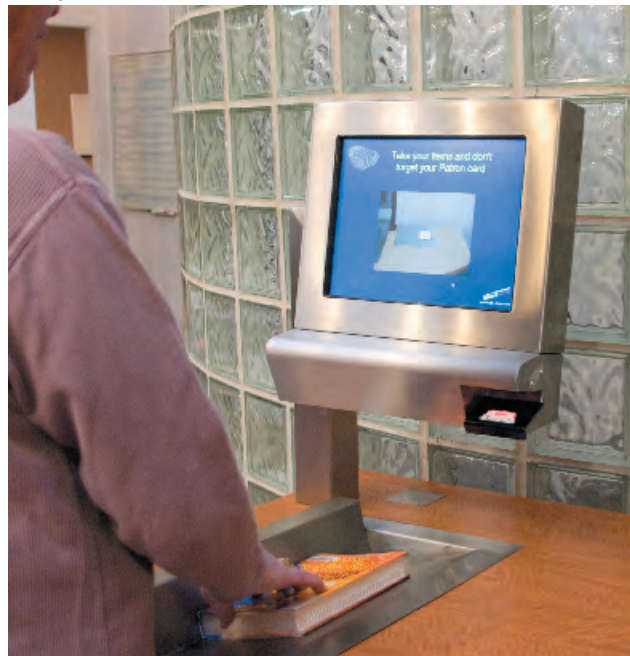

Providing Patron-Friendly automation

The large, flat-screen monitor features animated prompts and instructions which allow patrons to quickly and easily borrow library materials, in a choice of several languages. Upon removal the library card, an itemized receipt is automatically printed for the patron's records.

The Easy-Check units combine a PIN code option and library card reader for both magnetic, bar code patron cards or RFID Smart Card.

The top-mounted scanner accommodates all code locations, ensuring circulation system compatibility.

The Easy-Check units innovative design incorporates Libramation's WindowsXP®-based Lib-Digit™ software and supports Sip1 and Sip2, NCIP protocols, and communication with all popular library circulation software via TCP/IP or Telnet.

SCOT Self-Check Series
Self standing unit.

A unique feature of the Lib-Digit software accommodates of all types of security strips on library materials. A special contact method is used to safely process video and audiocassettes.

The integration of Lib-Digit software eases the workload for personnel with a simple platform. System functions can be quickly adjusted, and diagnostics are conveniently performed using the keyboard and mouse.

Creating self-service convenience

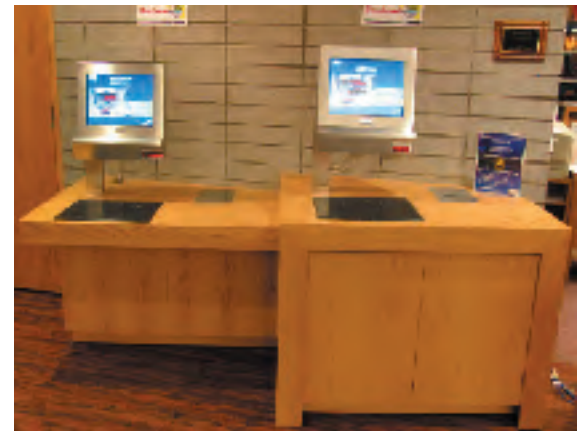

Made from wood and finished with a tough laminate, the units are available as a convenient free standing unit, a tabletop counter or as a circulation desk installation, customized to fit any library decor. All units are customized counters and are ergonomically designed, and wheelchair friendly to fit into any library environment. Counter height can range from 28" to 37" on our electric adjustable unit.
