

ACT Return 2

Simple and efficient materials handling!

Libramation's ACT-Return-2 unit allows for a quick and accurate interior check-in of material. This unit is ideal for a small library, and provides a more reliable check in than the traditional RFID enabled bookdrop.

This mini system is available with a bi-directional belt, separating items that need to be shelved and items that have a special status (hold/transit). The unit is height adjustable therefore the library is able to use their existing bins. Custom bins are available. The system includes:

- PC
- Thermal receipt printer
- Touchscreen,
- Antenna/Reader
- Lib-Digit Return software

Patrons are guided through the return process using customizable animations, text and graphics. Instructions can be in multiple languages and patrons are provided a receipt for all transactions.

Installation Flexibility

The ACT Return 2 provides the library with flexible installation options. The library can utilize their existing book return slots, or Libramation can provide a wood insert and stainless steel assembly.

Power Requirements 110 VOC+ 15 amp
