

Book Bank

Providing automated access to your most popular materials, 24/7!

Libramation's Book Bank is the answer for libraries looking to increase their circulation and improve services to patrons.

By using RFID technology with a vending machine style concept, the Book Bank will give your library the opportunity to have the most popular titles available to your patrons at any time.

Patrons simply scan their library card, enter an optional PIN, and make their selection. Using SIP2 to connect with your ILS, the borrowers status is confirmed, and an internal lift will gently deliver the book to the delivery door located at the bottom of the unit. An RFID reader will confirm the item, and charge the book to the patron's account. The door then unlocks, allowing the patron to retrieve their selection, and a receipt is delivered.

The sturdily constructed cabinet allows for exterior access, giving patrons access to the collection outside of library hours.

Specifications:

Dimensions:
47" H x 78" W x 24" D
(112 cm H x 19.95 cm W x 62.6 cm D)

Power:
110 VOC+ 15 amp

Capacity:
120 – 200 books
