- Eliminates costly EM strips and lock boxes
- Maximum storage capacity with a minimum footprint
- Multiple Installation options and models
- RFID or Barcode compatible
- Automatic Weeding to ensure most popular materials are stored
- Dynamic Storage increases the capacity

## How many CDs and DVDs are missing from your collection?

Even one is too many. Libramation's Media Bank, the *original* automated disc management system, is the solution to ongoing problems associated with securing your expensive disc collections.

### Ease of Use:

Libramation's Media Bank disc management system provides a secure solution for libraries circulating disc material. The Media Bank is seamlessly integrated with the library's automation system allowing patrons to borrow and return media without requiring any staff intervention.

An intuitive interface, a high resolution touchscreen monitor, multiple language options, and customizable instructions and graphics make every transaction with the Media Bank a successful one.

Allowing patrons to make their selections online remotely with the Web Reservation software provides a sustained circulation frequency of over 90 transactions per hour! Patrons place a short reservation via the software added to your library's website, and the item is automatically dispensed when they present their card at the machine.

### Features:

- Deep Link allows title specific links to be made from the ILS to web reservation
- Touch screen monitor for patron interaction
- Fully automated intelligent shelving with dynamic storage
- Remote diagnostic capabilities and administrative functions
- Solid, Heavy Gauge Steel housing capable of exterior installation
- SIP2 integration with all major ILS providers
- User and transaction statistics
- Optional Web Reservation software
- Optional Fast Loader

Media Bank Classic
