

# Lib~Chip Easy-Check Solutions

## Specifications:

Power Requirements:  
110 VOC+ 15 amp

For more information on any of the Easy Check models available, please contact a Libramation sales representative.

## Providing intuitive RFID patron self check!

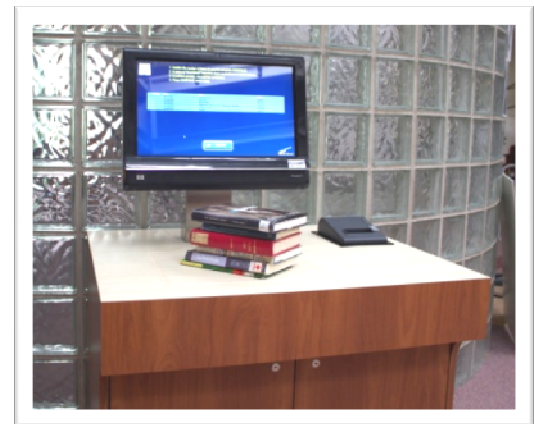

Libramation's Lib~Chip Easy-Check stations provide a fast, confidential way for patrons to sign out library materials on their own. The installation of an Easy-Check station not only promotes patron self-sufficiency and independence, it also allows the library to increase its service levels by reallocating staff from repetitive circulation tasks to more creative assignments all without having to add to its staff budget.

Each Easy-Check station is custom built to your specifications. We offer many model options including two stand alone Kiosk designs, a built in assembly model, and a counter top unit.

Libramation will also provide custom designed stand alone units, multiple stations in one cabinet, combination staff station/self check and children's sized cabinets. No matter what the library décor, Libramation has a easy-check that will fit!

Our Easy-Check stations allow patrons to:

- ◆ Choose the language they wish to use
- ◆ Check out and renew materials
- ◆ View circulation Information such as:
  - Hold items available
  - Outstanding fines
  - Number of overdue materials
- ◆ Return materials
- ◆ Receive a receipt after check-out, renewal and returns

## Easy-Check Models:

### Easy-Check Tower:

A Stand-alone kiosk with a contemporary design. Brushed stainless steel posts support a 15" LCD touchscreen with the remaining hardware housed in a slim lockable cabinet and a Corian top that is customized to the library's decor. The small footprint, less than five square feet/1.524 square meters, makes this an ideal system to process high volumes of material while minimizing the use of valuable floor space.

### Easy-Check SCOT Mini

Libramation offers a SCOT specifically for RFID. The screen mount has been replaced with an HP Touchsmart 300 PC. This 20-inch touch screen and PC combo is mounted to a stainless steel arm that is attached to the cabinet work surface, all cables are housed in the arm, allowing for clean cable management and additional storage space in the cabinet. The unit includes an external barcode reader, printer and printer cradle.

### Easy-Check Assembly

This system includes all the hardware and software components for an Easy-Check unit. This installation can be built into either new or existing millwork, allowing for maximum customization and integration with the library's décor. Copies of the necessary detailed line drawings and mechanical specifications will be provided to the library's architects and contractors to ensure all components will be properly housed.
