

SCOT- Self Check Out Terminal

What SCOT does for you!

- Reduce materials handling by staff
- Reduce time required away from public
- Increase public service without increasing your budget!
- Reallocate staff effort from repetitive circulation tasks to creative tasks
- Improve customer self-sufficiency
- Provide patron privacy

Providing patron-friendly and reliable automation for your library!

With over 500 units installed across North America, the SCOT is a synonym with quality and dependability.

Libramation's SCOT is the cornerstone of our automation solutions. Providing numerous ADA compatible models and installation options, the SCOT compliments any library décor while freeing up valuable staff time.

Boasting a near 100% first time user success rate, the easy and intuitive instructions guide patrons through all self check transactions. The SCOT is able to process materials with various barcode locations and different patron card formats in real time. By using SIP2 and NCIP to communicate, the SCOT is compatible with all major ILS systems, including SirsiDynix, Innovative, Polaris, Minisis, KOHA, Evergreen, and many more.

Customization; Making the SCOT your own!

SCOT Assembly – Custom installation

Libramation's SCOT units are custom made for every installation. Everything from the laminate used, to the software functions are chosen by you!

Hardware Customization:

The physical layout of hardware components is

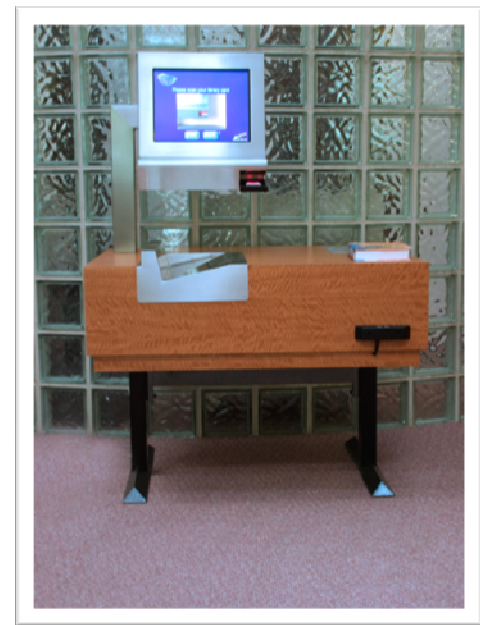

determined based on your specifications, which ensures that your custom cabinet will receive the design and hardware layout best suited to optimized patron transactions. The countertop and base cabinet laminates are available from manufacturers such as Wilsonart, Formica, Nevamar and Arborite. You can choose between different styles, including free standing kiosks, table top models, and an assembly unit which is built into new or existing library millwork!

Software Customization:

The Lib~Digit software contains easy to use customization features that allow you to tailor the software to meet your library's individual needs.

You can:

- Edit the text, graphics and layout of most windows
- Create .wav files to customize audible instructions
- Customize the buttons
- Choose and customize the animations used with the option of adding your card image to the animation
- Activate an additional layer of security with a PIN
- Provide up to 6 additional language options
- Choose receipt options, including email receipts, as well as all information detailed on receipt.
